**OpenType** The OpenType Fonts package makes it easy to install and use Type 1, Type 2, and TrueType fonts in Photoshop. You can use them in images, documents, and webpages.

**TrueType** The TrueType fonts offer some extra formatting features, like ligatures, fractions, old-style numbers and so on.

**Type 1** Type 1 fonts were developed for printing, for which a two-column format was best suited. Type 1 fonts are therefore limited in their number of characters, which has led to some people referring to them as "invisible fonts." However, they are still perfectly usable in the digital world.

**Type 2** Type 2 fonts are optimized for computer screens. They are very popular because they reduce the file size and can be scaled to fit your browser. However, the limited character set limits the usefulness of Type 2 fonts.

**TrueType** The TrueType format was developed for an even greater range of fonts because it is based on the legacy Font Interchange Format standard. You get the convenience of old-style numerals, improved curves, hinting, kerning, and a host of other advanced features.

**Embedding** In the

### **What's New In Photoshop 2022 (Version 23.1)?**

The Panama Canal could be full of robots within 20 years according to military technology experts, and a new acquisition strategy would help America prepare for any kind of attack on the waterway. Designers, engineers and industrial engineers at the Pentagon are currently working to develop "man-machine teams" that will be able to work hand in hand with one another in the future, when the Panama Canal is under attack and the U.S. needs a way to save lives. "It makes a lot of sense that while we're enhancing the security, why not also make the safest way to move people and materials within the canal safer," US Navy Rear Admiral Peter Olson told Military.com this week. Olson is the assistant chief of the Navy's Joint Forces Command and Future Joint Combat System. The Panama Canal is under threat of closure because of the expansion of the Chinese-owned Panama Canal company. Construction was started in February 2014 and is expected to be completed in September 2023. This will allow a third ship passage through the canal and possibly fifth. The Panama Canal has been under pressure from the military as it has the responsibility for the canal's safety as well as being a military part of it. The Defense Department's budget has seen an increase of \$300 million in the current fiscal year. The U.S. expects to spend \$55 billion over the next 30 years on the canal expansion project, The Wall Street Journal reported. The controversial project to expand the canal will also be likely to increase tension between the U.S. and Mexico. turn the Canal into a warship the Navy will have to rely on technology, reports Military.com. Engineers in the military have been working with engineers from the US Army Corps of Engineers to develop intelligent drones that could be used to safely clear debris in a canal that is clogged by a ship. There are also robots that can recover people, such as the Serena robot, which uses a combination of sonar and infra-red that is used to find victims in the canal, then is used to pull them to safety. Olson sees the robots as having a pivotal role in saving lives in the Canal. "The robots are an extension of our human security forces and could serve as an adjunct to the human security forces in the canal. That is
