The Girl and the Robot is a fighting game with a deep story written by the New Zealand gaming icon, Doulcán. Admitting that the first game took many years to develop, he stated that years of development was well worth it. Namely from refining the game play whilst adding new fighting and skill moves. Using the special link feature players can successfully perform different special moves, even on the BOSSES!

This is a FREE game for anyone who has an i-Pod Touch and the FREE NEW ZEALAND GAME OF THE YEAR app. The code DOES NOT replace the original game, it just 'shortens' the existing game play. It's a great game, you really should download it!

Lyle the Procrastinator is a game by Mezlo. It is a fast-playing game in which you must manage your Labyrinth row, where you should think in terms of long-term strategies, rather than just reacting to the fast-moving action going on around you. Lyle has hidden powers of his own, which he may use to his advantage or to thwart your plan. The rules of the game are provided in English, but please ask your friends if you don't understand anything. This game is a good gateway game, and maybe even a gateway game to gateway games. Note that there is no need to spend any more than 40 seconds (or 240 ticks) to learn the rules, but don't stop playing for the rules – the game is won by getting the most Locations in your Labyrinth row. Characters, Locations and Labbories: 16 new characters. 9 new Locations. 4 new Labbories. By the way, the game's box shows a picture of the basic game, but is for the expanded rules. (and you can, if you like, build 16 new Labyrinth rows, using the same Locations and characters, and use the box for the new rules...) Of course, I will not get you to buy a box, but if you like I could put you in touch with Mezlo... Your goal is to make a fortune through illegal drug manufacturing and to become a very rich businessman. But not everyone is going to get a share of the profit, as there are plenty of enemies. You have to defeat them all and to eliminate competitors. Do it in a clever way: you do not want to go too far, as your enemy becomes aware of your actions. Besides, never, under any circumstances, do illegal substances. But there is a simple, fast, and absolutely safe way of getting cash. Enormous production plants are now open in the province, and you can buy them for a handsome sum of money. Do not forget that you will have to supply your production plant with all necessary materials. Nevertheless, the combination of drugs production with tourism will be profitable, as the key for success in this branch is a large number of clients. You are constantly receiving orders, to which you have to respond as fast as possible. As long as your business lasts, you receive commissions on the purchase of your drugs. However, in case of a large-scale production, you will be able to make good money. And if your business lasts for a long time, you will gradually accumulate a big amount of cash. All this is possible with your own production company. And you do not need a large investment capital. It is enough to buy a small plant, for which you can get a loan. A few years later, this will have become a big business and you can even buy a luxurious villa, hire a number of employees, and organize a gigantic show that will enable you to earn many thousands of euros every month. And you do not have to worry about police. The law is powerless over you, as you do not deal with anything illegal. If the police catch you, they will start a criminal investigation, which may include a long prison sentence and a heavy fine. But you do not have to worry about the police - and you can get away with anything. What's new:

So let’s get all of our polite, civil, nice guys gotten to bed, lather up in soap and wash their collective arse for being such okay-sized idiots. You don’t deserve any more favours or toadyery from anyone. Enough with all of this musty appeasement BS. Let’s arm up, get good food in our bellies, and then we can go to sleep. Wake me when I disagree with you. We are done chasing after Feminists and they are done turning on us. We are done lying to ourselves and to the very men we are supposed to be protecting our children from. We are done justifying basic, fundamental, important for women and children causes, even at the cost of men. I know all I have to do is post a slasher-website, some pictures of Xena and even Lucifer. Got it. But this is what I think, this is what we all think. We know the truth and we know the truth isn’t pretty. We live in a world built on whitewashed wallboards and hate crimes though it is embedded and flame kicked all along the way. This is Erannoth born 20 years after the great fall (my last post was about the subject) and it is a damn good time to start at square-one again. We are back baby. Erannoth. The most beautiful of all worlds. It is free. It is undomesticated. It is just our old friend, Mother Earth. It is perfect and it is truly our Birthright. For our Birthright we forgot who we were. We forgot to remember that we are a collection of People. People who love one another and don’t care about whether or not you are a man or woman or parent. We are People banding together in love. The Dark Days are over. If you want to play the game of Dragon Tiger Grasshopper Fox with your fellow men then I applaud you. I should also know that as much as I desire for others to join with me in my vision for the future of Erannoth there are those out there, and it seems more than like a never-ending tide, that will for no reason at all but sheer spite and jealousy beat their chests and accuse us of hate, sexism and chauvinism until all you can do is smash them squarely in the face. I would like to believe that they will convert to our

The Professional Farmer: Cattle and Crops is an open world farming simulator game for the PC and is the third instalment of the series 'Professional Farming'. The PC version of the game is of course developed in cooperation with the publisher of the 'Professional Farming' series, Reaktiv Software, and it includes all of the major new features from the previous game - plus a whole lot more! The Digital Package is exclusively available as part of the "Digital Supporter Pack" DLC package. Features Take care of your flock You no longer just farm animals: with the new Professional Farmer: Cattle and Crops you can also take care of your flocks. And care for them you do! Prepare your herds in all the necessary ways - only then can you expect outstanding results. The German edition of the Agricultural Machinery Magazine "Stark" The stand-out feature in the 'Digital Supporter Pack' is of course the original soundscape of the 'Professional Farmer: Cattle and Crops'. It is a harmonious combination of well known sounds from open world farming simulators, and it offers you the feeling of being immersed in the wide fields and meadows of the wide open world you're part of. Take advantage of both summer and winter The Professional Farmer: Cattle and Crops is about real farming, not simply about summer and winter. And you will have to ensure that your flocks do not become victims of hypothermia in the winter or of heat-stroke in the summer. For that, you need not only to look after the feed supply, but also spend money on the right equipment for the right time of year. The Digital Supporter Pack makes sure that you never miss a single opportunity for success during your time at the farm! Find the right equipment As with the previous game in the series "Professional Farmer", it is possible for you to use different types of equipment on your farm - from tractors to shepherds, to ploughs to silos. With the Digital Supporter Pack you don't just buy any equipment, but can also acquire the most suitable piece for your farm and your needs. Manage your equipment An individual installation of the new game, like an "in-game" farm, is not enough. Thus, the "Digital Supporter
